

SAMPURNA DAS

Asansol, West Bengal | +91-7811088648 | sampurna282003@gmail.com

[LinkedIn](#) | [GitHub](#) | [LeetCode](#) | Portfolio

PROFILE

B.Tech Computer Science student (2027 batch) skilled in Java, full-stack development, AI, and problem-solving. Experienced in building AI-powered, IoT, and web-based applications using Java, Python, React, and SQL. Strong understanding of DSA, OOPs, DBMS, Operating Systems, and Computer Networks. Solved 500+ DSA problems on [LeetCode](#) and passionate about developing efficient real-world software solutions.

EDUCATION

Degree	Institution	Year	CGPA
BTECH(CSE)	Vellore Institute of Technology	2023-27 (Expected May 2027)	8.96
12th(PCM)	Asansol North Point School	2022	91.2%
10th	India International School	2020	96.33%

SKILLS

- **Programming Languages:** Java, C, C++, Python
- **Web Technologies:** HTML, CSS, JavaScript, React
- **Database & Tools:** SQL, MySQL, Git, GitHub
- **Core Concepts:** Data Structures & Algorithms, OOPs, DBMS, Operating Systems, Computer Networks
- **Technologies:** AI/ML, NLP, IoT, REST APIs
- **Soft Skills:** Problem-Solving, Teamwork, Communication, Leadership, Adaptability, Quick Learning

PROJECTS

1. [HireDesk – AI-Driven Resume Screening System](#) | Python, Flask, NLP, BERT

- Built AI-powered resume screening platform using NLP, BERT embeddings, and cosine similarity for candidate ranking.
- Reduced manual screening time by 60% and ranked resumes using cosine similarity with 85% matching accuracy

2. [StayEase – Full-Stack Hotel Management System](#) | React, JavaScript, MySQL

- Developed full-stack hotel management application with room booking and customer management features.
- Designed responsive UI and centralized booking workflow using React and MySQL.

3. [VeriFace – AI-Powered Face Recognition System](#) | Python, Machine Learning

- Developed AI-powered face recognition system for real-time facial detection and identification.
- Implemented computer vision techniques to improve authentication accuracy and performance.

4. [TripWise – Travel Planning Website](#) | React, JavaScript, HTML, CSS

- Developed responsive travel planning website with interactive trip and destination management features.
- Improved user experience through intuitive UI/UX and responsive frontend design.

5. [IoT-Based-Automatic-Irrigation-System](#) | ESP32, Soil Moisture Sensor, IoT, Embedded C, Blynk

- Developed smart irrigation system using ESP32, soil moisture sensor, and relay module for automated water control.
- Reduced water wastage through real-time soil monitoring and automatic pump activation.

CERTIFICATIONS

- AWS Academy Generative AI Foundations (AWS Cloud)
- Java Foundation Associate (Oracle)
- Machine Learning using Python (SimpliLearn)
- Frontend Development (SimpliLearn)
- Generative AI (SimpliLearn)

ACHIEVEMENTS

- Solved 500+ DSA problems on LeetCode
- Achieved 5★ in Java | SQL | Problem Solving on HackerRank
