PROFESSIONAL SUMMARY

Software Developer with strong foundations in Java, Object-Oriented Programming, and Data Structures & Algorithms, and hands-on experience building backend systems and full-stack applications. Skilled in Java, Python, SQL, REST API design, and database design, with additional experience in React, Next.js, and Node.js. Proven ability to translate system design into clean, working code, troubleshoot complex defects, and deliver measurable gains in performance and accuracy.

TECHNICAL SKILLS

Programming Languages: Java, C, C++, Python, JavaScript, SQL

Software Foundations: Data Structures & Algorithms, Object-Oriented Programming, Class & System Design, Database Design, Unit Testing, Machine Learning, NLP

Web Development: React, Next.js, Node.js, Express.js, REST API Integration, HTML, CSS, NextAuth

Databases & Tools: PostgreSQL, Prisma, Git, GitHub, AWS, Version Control Workflow

PROFESSIONAL EXPERIENCE

Full Stack Development Intern — Rigzz Technologies

May 2026 – Jun 2026

- Developed responsive full-stack web applications using JavaScript, HTML, and CSS, improving cross-device usability and page performance.
- Built and worked on backend logic and data handling for application features, collaborating with senior developers to troubleshoot and resolve software bugs, reducing defect turnaround time and improving application stability.
- Participated in structured code reviews to enforce coding standards, improve code quality, and support team-wide best practices.

PROJECTS

SocietyPulse – Smart Society Maintenance Platform | Next.js, TypeScript, Prisma, PostgreSQL, NextAuth

- Built a full-stack society maintenance platform with separate resident and admin dashboards for complaint management and tracking.
- Designed a modular class structure separating complaint, user, and notification domains for extensibility, supporting SLA monitoring, complaint analytics, status/priority tracking, and role-based authentication.

HireDesk – AI-Driven Resume Screening System | Python, FastAPI, NLP, BERT, TF-IDF

- Built an AI-powered resume screening platform that parses job descriptions and resumes and ranks candidates using semantic embeddings and similarity-based matching.
- Reduced manual screening effort by 60% and achieved approximately 85% matching accuracy through automated candidate ranking.

VeriFace – AI-Powered Face Recognition System | Python, Machine Learning, Computer Vision

- Developed a real-time facial detection and identification system using machine learning and computer vision techniques, improving authentication accuracy.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science & Engineering

Expected May 2027

Vellore Institute of Technology (VIT) — Vellore, India | GPA: 9.02/10

Higher Secondary (12th Grade), PCM

May 2022

Asansol North Point School — Asansol, India | GPA: 91.2%

Secondary School (10th Grade)

May 2020

India International School — Asansol, India | GPA: 96.33%

CERTIFICATIONS

Generative AI Foundations — AWS Academy (AWS) | Java Foundations Associate — Oracle | Machine Learning Using Python — Simplilearn

ACHIEVEMENTS

Solved 500+ Data Structures & Algorithms (DSA) problems on LeetCode. | Achieved 5-star rating in Java, SQL, and Problem Solving on HackerRank.
